

## Tell Me About Yourself

Hello. I am Venkat Sumanth. I have a strong background in software development and have been working in the industry for over 1 year. I have a degree in Electronics & Communication Engineering, which has enabled me to design and develop complex systems. In my current role, I have experience with different technologies such as sql, database and python.

Recently, I have increased the revenue of my company by 30% by optimizing and modernizing existing databases.

I am confident that my strong academic background and enthusiasm for this industry will make me a great asset to any team.

I have read the job description and as you require the candidate to be good at communication skills and presentation skills, that's my core strength. Moreover, I have a complete understanding of sql and python which will enable me to continue contribute in the upcoming projects with minimum supervision.
